

657—21.15(124,155A) Facsimile transmission of Schedule II controlled substances—long-term care facility patients. A prescription for any Schedule II controlled substance for a resident of a long-term care facility may be transmitted by the practitioner or the practitioner's agent to the dispensing pharmacy via facsimile.

21.15(1) Original prescription. The facsimile serves as the original written prescription.

21.15(2) Information required. The patient's address on the prescription shall indicate that the address location is a long-term care facility.
